

# FORMULA 950

## FORMULA 950

### SPECIFICATIONS

<b>Throughput</b>	200kg/hour
<b>Drum</b>	2.5 rpm, 380mm dia. x 1800mm long
<b>Pump capacity</b>	70 litres/min @60psi
<b>Wash Temperature/Power</b>	65°C, 12kW heater
<b>Dry Temperature/Power</b>	80°C, 12kW turbo dryer
<b>Dimensions</b>	2250 x 920 x 1350mm
<b>Load height</b>	910mm
<b>Options</b>	7 day timer, Disc skimmer, extraction, autoloader

The Formula 950 Rotary Drum is designed for cleaning small parts in batches or in-line with production conveyors.

Parts are fed into an immersion and power jet wash section and traverse through the machine at a constant speed via a helical spiral.

The centre section drains the parts before they meet hot turbo blown air in the final stage from which parts exit dry, sparkling clean, ready for use.

Modifications and improvements to Guyson machines are introduced from time to time as a direct result of our policy of continuous development. Consequently all designs and specifications quoted must be regarded as subject to change. Please refer to quotation.
